Re: Television Production Charts

Please make copies of the attached form and keep one as a “master copy” for updates, changes and future television projects.

Please fill out the form as completely and accurately as possible (typed is preferred). In order to be listed in the Television Production Charts, the following information **must be included**:

- **Start date of production**
- **Wrap date of production**
- **Phone number**

The Television Production Charts reflect **only** the television shows that:

- **Are in active pre-production or production**
- **Will be airing in the United States on a major network, national cable network, or in national syndication**

Shows in development or post-production are not eligible for listing and we cannot guarantee that every television listing submitted will be listed in the charts.

The television production charts update throughout the week and are available on our website at www.thr.com/productioncharts.

When making **changes** to your listing, do not resubmit the complete listing, only the new information needs to be submitted on the form. Please be clear, indicate next to each revision the type of change that needs to be made, i.e. addition, deletion, correction.

You may email, fax or mail in changes and updates. Fax 323-525-1453 or email: productioncharts@hollywoodreporter.com

Please remember, we are a service to the television industry and as such we need your help in keeping the charts up-to-date and accurate. Television productions that have inaccurate information listed, or show no updates within 90 days will be removed from the charts.

If the information is not legible, we cannot guarantee accuracy. Feel free to enter our form into your computer, but please keep the same or a similar format.

Thank you for helping keep your television production information up-to-date.
